

North Dakota State Project

[North Dakota Covering Kids](#)

GRANT AMOUNT: \$669,963

START DATE: September 1, 1999

Grant Overview

The North Dakota Covering Kids project is designed as an outreach program within existing infrastructures aimed at identification and enrollment of eligible children into existing health coverage programs. The overall goal of the project is increased access to health coverage for needy children in North Dakota.

STATE PILOT PROJECTS: [Native Indian Families Pilot Project](#)
[Farm and Ranch Family Pilot Project](#)

North Dakota Pilot Project

Native Indian Families Pilot Project

Pilot Overview

The Native Indian Families pilot project will identify and enroll children who are uninsured and eligible for existing services. Cultural congruence and buy-in from local leaders will be essential; therefore, coalition-building between and among tribal and county representatives is crucial. Outreach staff personnel will work in collaboration with local children's health services agencies to provide information about programs and eligibility.

North Dakota Pilot Project

Farm and Ranch Family Pilot Project

Pilot Overview

The rural outreach project will identify and enroll children who are uninsured and eligible for existing services. The Field Project Director will develop a statewide system of training child advocacy volunteers to assist farm/ranch families with completing applications for child health coverage under Medicaid and SCHIP.
